

Klear Karma Mirror

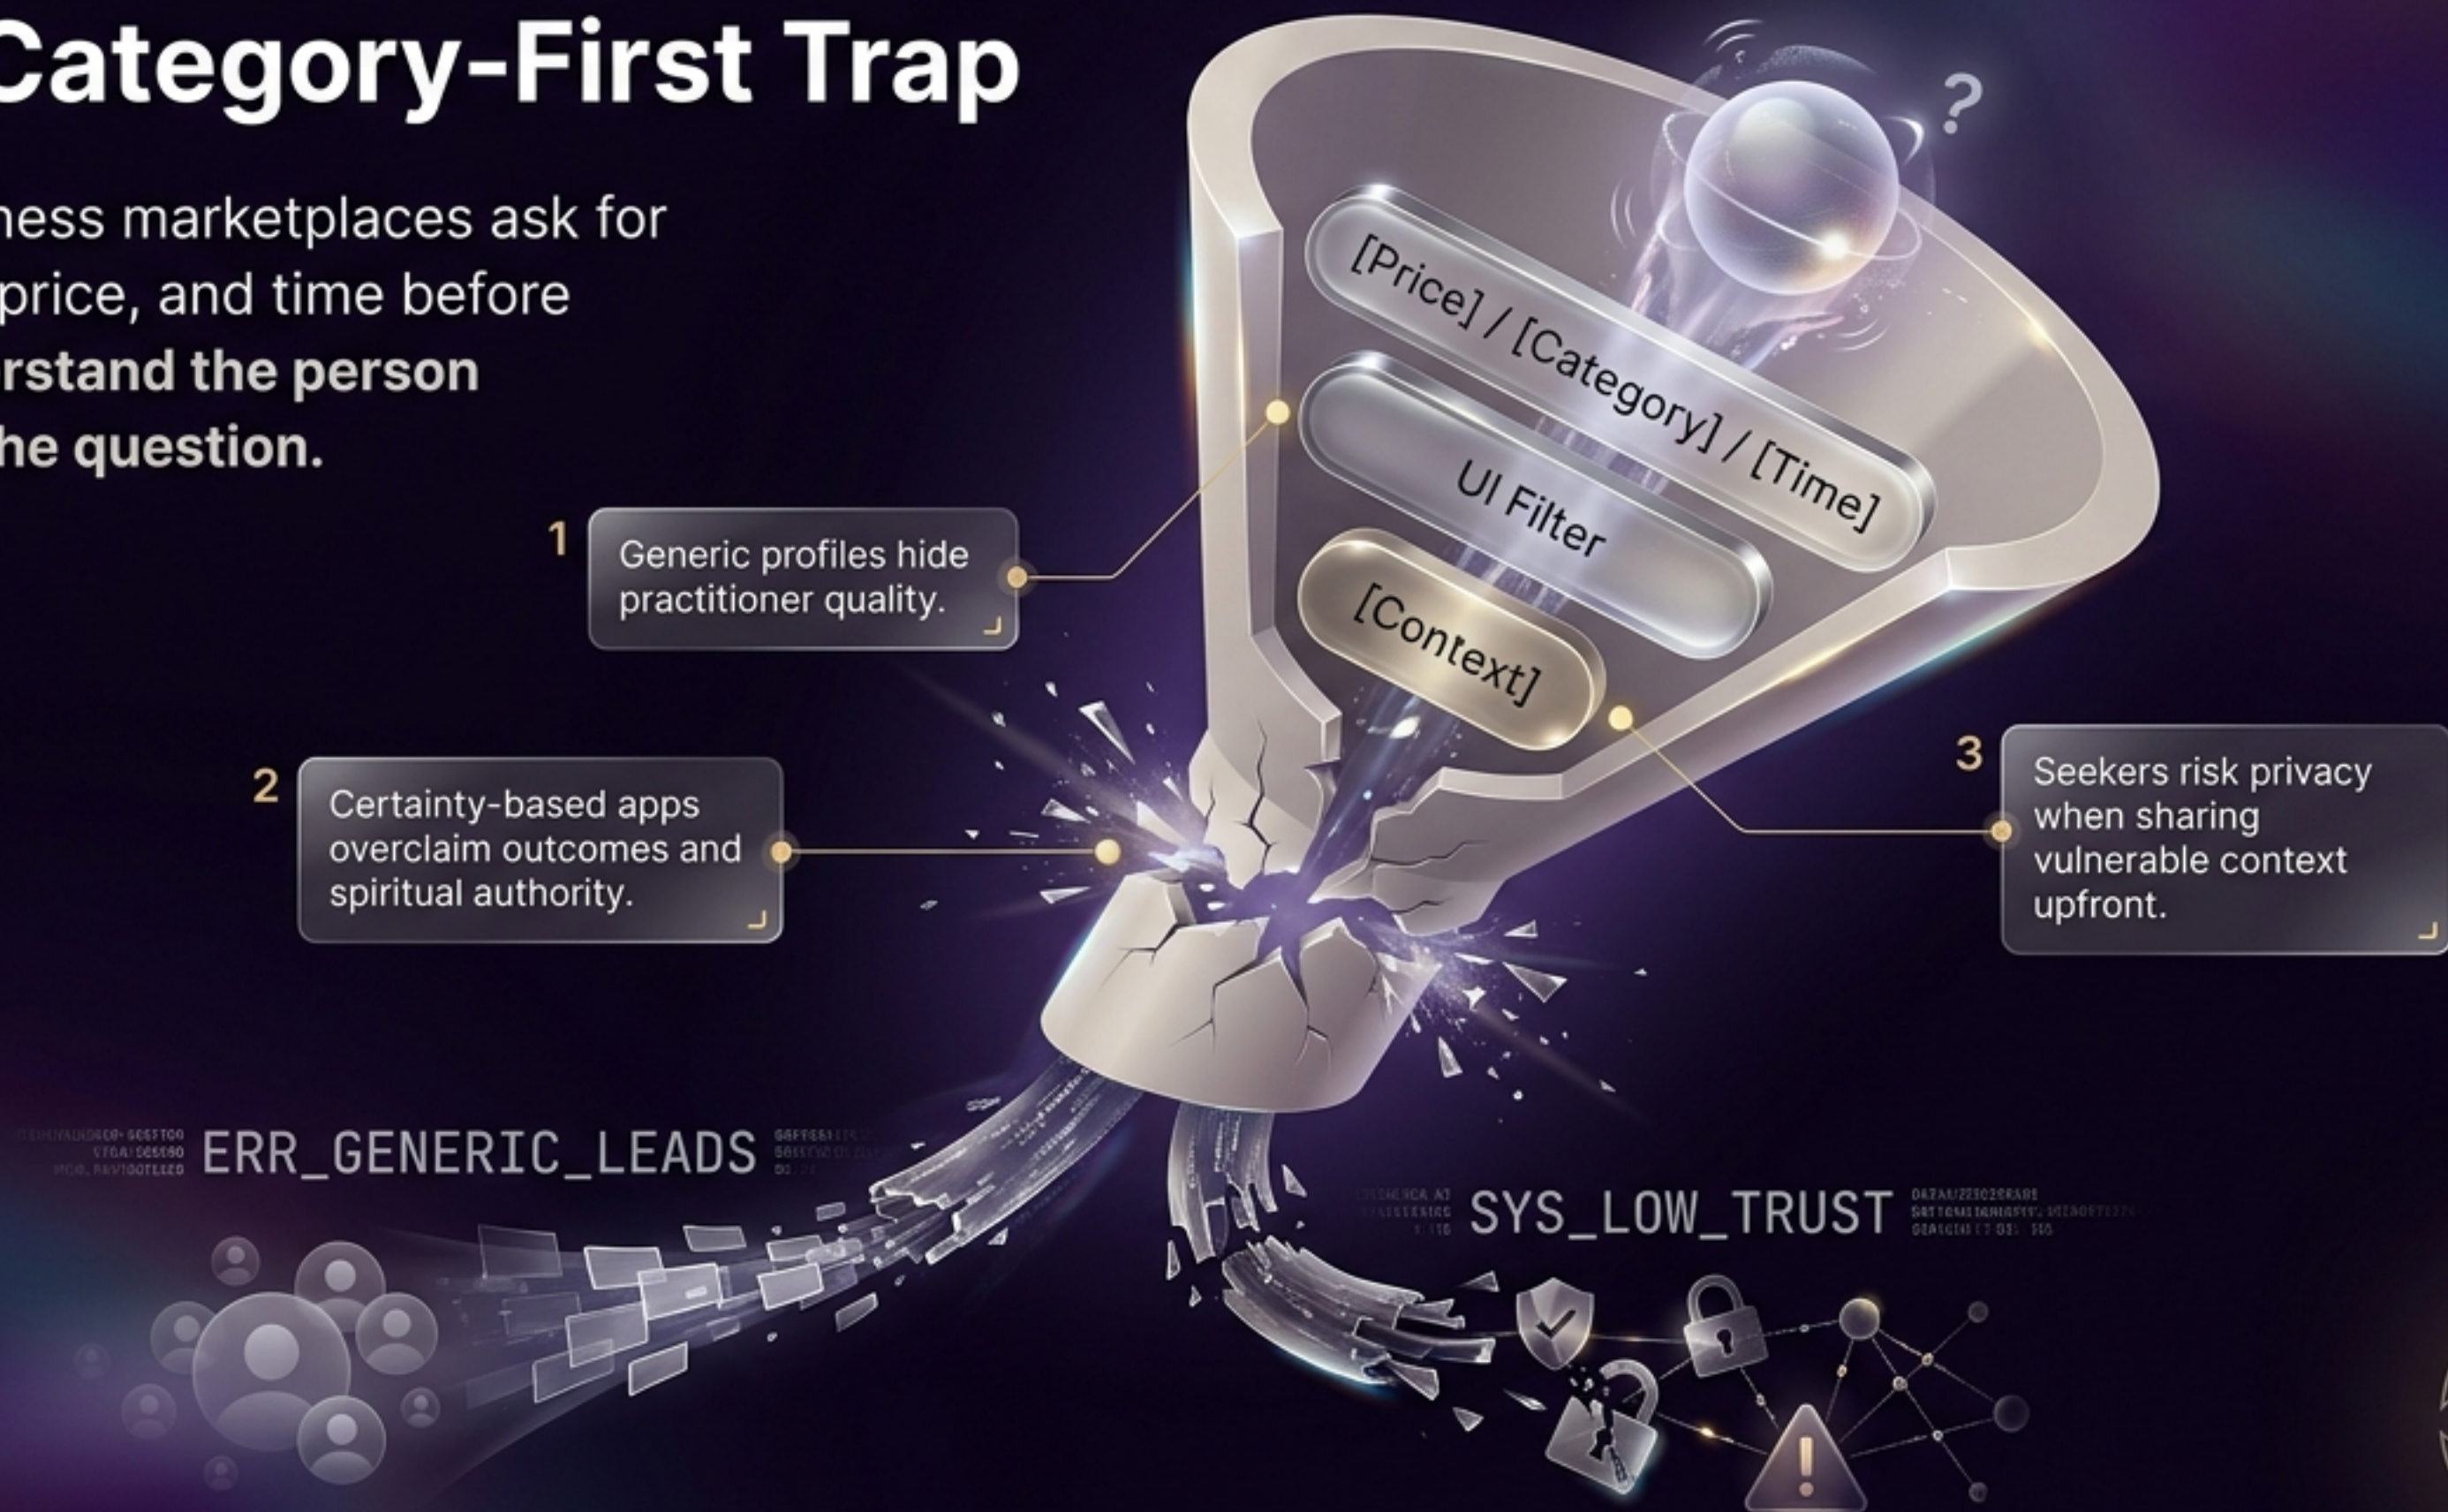

Turn Reflection Into Trusted Support

An app-native reflective guide that turns seeker context into a consent-safe seeker map, token spend, and verified practitioner handoff.

The Category-First Trap

Most wellness marketplaces ask for category, price, and time before **they understand the person carrying the question.**

The Paid-Intent Engine

Mirror asks one primary question at a time → summarizes lived context → asks for confirmation → creates a consent-safe seeker map.

The Safety Boundary: Uses symbolic context carefully. Never claims clinical authority, predicted outcomes, or deterministic spiritual certainty.

Anatomy of the Interface

Three Pillars of the Trust Protocol

Mirror Token Flow

Turns reflection into measurable intent, bypassing the vanity metric of free signups.

[TOKEN FLOW: INTENT > SIGNUP]

Practitioner Trust Layer

Verified profiles receiving explicit, consent-safe context handoffs.

[TRUST LAYER: EXPLICIT CONSENT]

Protocol-Reviewed Commerce

Profile-scoped product listings, manually reviewed to prevent generic shop clutter.

[VERIFICATION: MANUALLY REVIEWED]

Contextual Routing in Practice

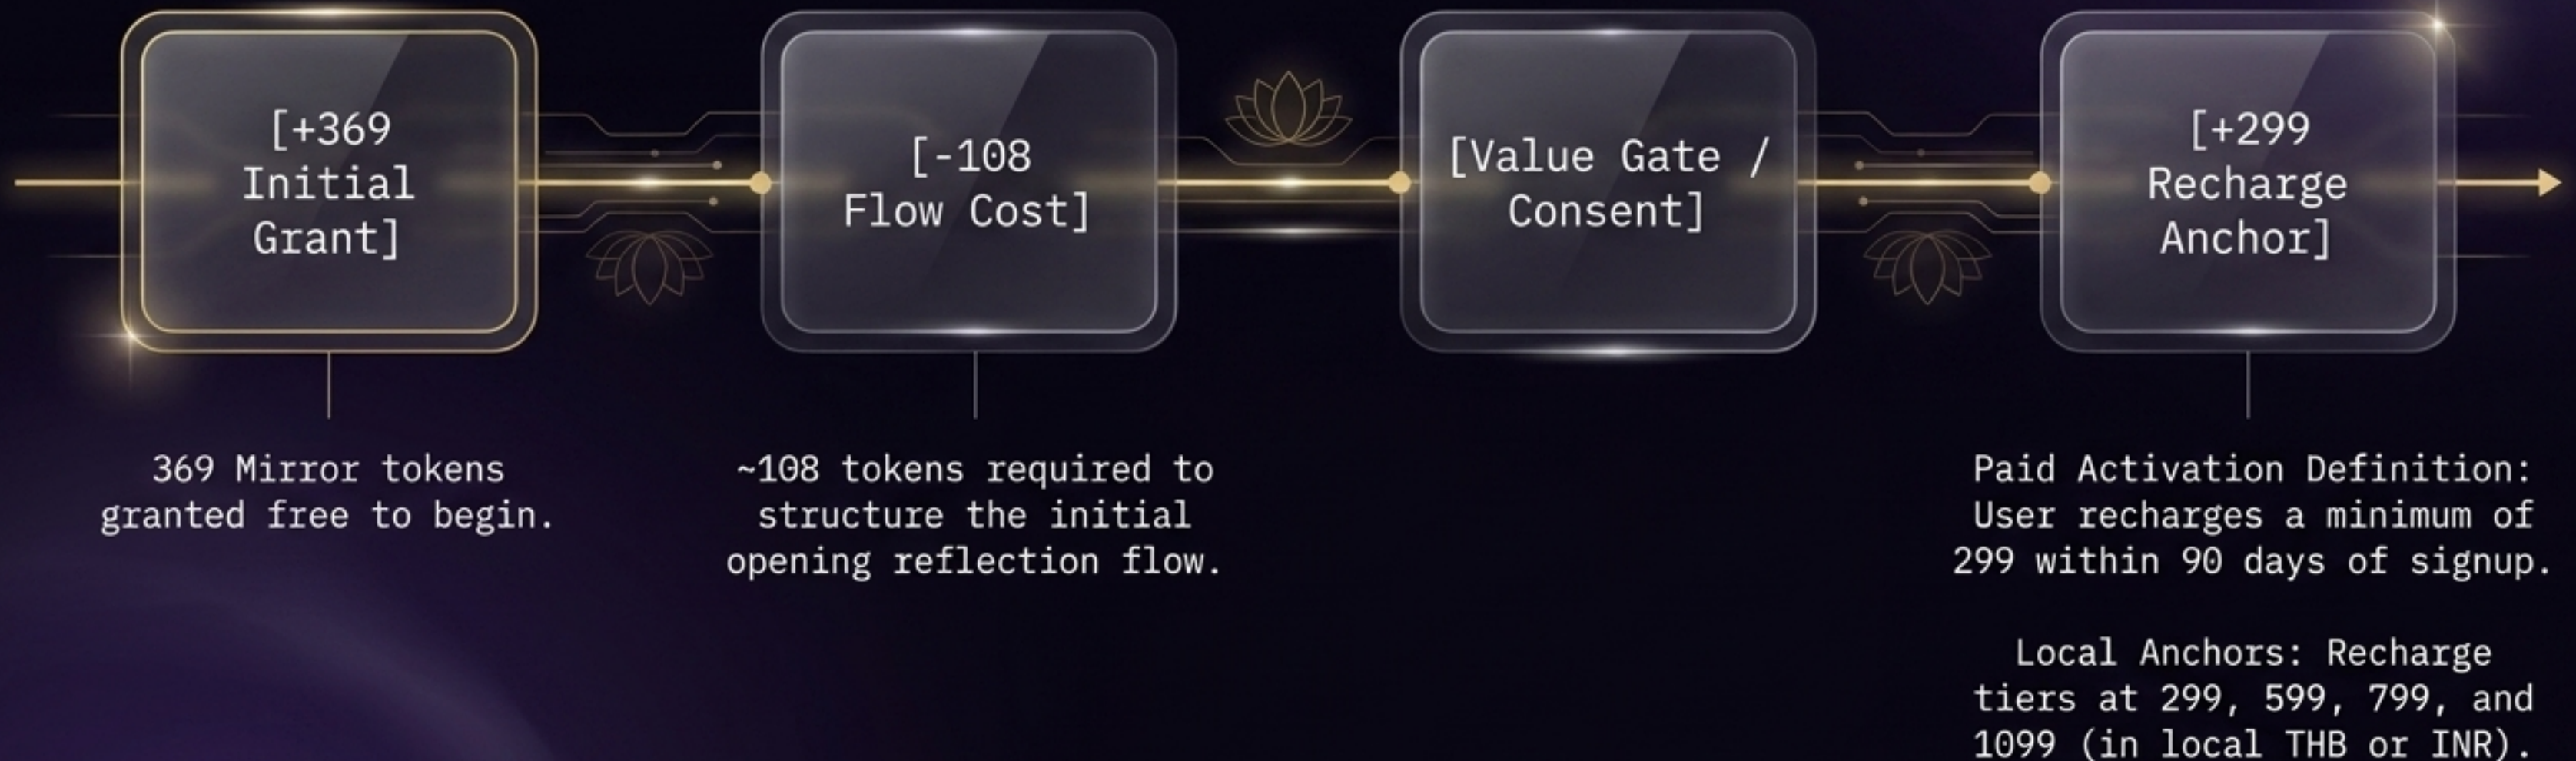

The Category Gap Diagnostic

Dimensions	Generic Directories	Certainty-Based Apps	Klear Karma
Intent Signal	Optimize for browsing	Optimize for consumption	Optimizes for paid activation
Context Handoff	Generic leads	Deterministic	Consent-safe maps
Claim Boundaries	Filters first	Overstate authority	Symbolic context only
Commerce Layer	Unregulated commerce	Content-driven	Protocol-reviewed listings

The Economics of Insight

Recharge only if reflection creates value. Zero consultation commission in MVP.

Validating Trust Liquidity

Strategic Focus: Validating token utility and handoff quality before broad global acquisition.

Signals Monitored: Mirror-to-Recharge Conversion, AI-to-Human Handoff Rate, Practitioner Earnings Activation.

The Fulfillment Ecosystem

The Core Moat: The marketplace is merely the delivery mechanism; trust and context are the actual moats.

Start With Reflection

Status: Controlled Invite-Led Beta currently active in Thailand & India launch circles.

Reflect before you browse. Form a consent-safe seeker map before moving toward practitioner support.
